U.S. ROUTE 3 PROJECT GETS UNDERWAY IN HOOKSETT
INCLUDES INTERSECTION IMPROVEMENTS AT ALICE AVENUE

The New Hampshire Department of Transportation announces construction work is underway in Hooksett on U.S. Route 3 intersection improvements and pavement rehabilitation from Exit 9 of Interstate 93 north to Alice Avenue (approximately one mile).

This project includes the addition of turning lanes and new traffic signals at the intersection of U.S. Route 3 and Alice Avenue.

Motorists should anticipate intermittent lane closures and occasional traffic shifts throughout this project. Some delays can be expected.

Weaver Bros. Construction Co. Inc. of Bow, New Hampshire is the prime contractor for the \$1.25 million project, which is scheduled to be completed in September 2003.
